League #3: Thursdays 6:00-9:00 @ BNS-Springfield

Cost

\$120 per team (\$60 deposit required at registration)

GIVE YOUR TEAM THE PROBATTER ADVANTAGE PX2

Revolutionary Training System Creates Results

The new and improved ProBatter PX2 *Baseball Simulator* pitching system is the most advanced and realistic training system for improving hitting skills available anywhere. Professional-grade and industry-tested, ProBatter's patented video simulation allows hitters to face a variety of different life-size pitchers projected on an 8' X 10' screen. The life-like simulation allows batters to experience game-like conditions resulting in improved timing, rhythm and game day performance.

GAME DAY PERFORMANCE

Realistic Simulation Improves Hitters' Timing and Rhythm—Delivering Tangible Game Day Results.

ProBatter's patented synchronized video simulation creates a dramatically realistic game-like environment. Basic one-dimensional pitching machines don't offer visual reference to a pitcher's release point and can actually hinder a hitter's timing and rhythm on game day. No other pitching machine or training tool can provide the fully-programmable range of pitches, ball speeds, pin-point accuracy or realistic video simulation like the PX2 Baseball simulator.
